*‘We Create
Clean Water
from the Air’*

Experience

Since 1986, Mr. von Welczeck has transacted business in 22 different Countries spanning 5 Continents.

In 2006 he Co-founded SOLAR POWER PARTNERS (“SPP”, acquired by NRG in 2010), and as CEO from 2007-09 his team pioneered PPA based DG PV financing, completing three different ITC tax equity solar funds.

In 2010-11 he conceived & originated the “Solar Deal of the Year” for CONCENTRIX (now SOITEC) with 305MW of PPAs for SDG&E.

He has served in both domestic and international (EU) management and executive marketing & sales capacities at THYSSEN-KRUPP, DOVER, DORMA, and FRIENDLYWAY.

He lived and worked in Europe (UK, Germany) from 1990-2001.

Mr. von Welczeck is a University of San Francisco (USF) business graduate (BSBA, 1985), and is a member of the Construction Specification Institute (CSI), and the Sierra Club.

Firm Profile

SkyH2O's only works with world-class “best-of-breed” suppliers and partners who also are attentive to human, social, environmental and ethical issues related to the management of water resources. We are committed to providing technology solutions that are environmentally sound and respectful of each communities needs.

SkyH2O develops sensible, sustainable, and profitable projects that produce potable water that meet WHO standards. We strive to preserve America's natural environments by locating water facilities at/near the most effective locations typically by existing reservoirs thus preserving farming, endangered habitat, flora and fauna. We strive to improve communities through significant water project infrastructure investments and by creating valuable local sustainable jobs that will provide long-term local economic stability. Valuable community benefits can include:

- Stimulate sustainable economic development
- Increase the diversity and reliability of the water mix “portfolio”
- Provide clean-tech education, job training and new employment opportunities
- Improve public health
- Promote stable water prices
